"This is an RPG that came out for the PC. The battle system that uses skill over items and weapons is very fun. The story has a good dose of action and humor as well, and it really has you on edge throughout." Nintendo Switch Review: Everfest: The Silver Guardians Everfest: The Silver Guardians is a strategy RPG similar to The Unspoken World with a few slight differences. But the biggest change is the setting, as the game's location is an alternate version of the lands seen in The Unspoken World. The setting may be different, but you'll still be battling other monsters for your life as you explore the world and face off against bosses. The game also makes good use of the Nintendo Switch's unique voice functions, with various spells being called into being with a wave of your hand and heroes coming to life to carry out your commands. Everfest: The Silver Guardians is a unique take on the typical adventure RPG for the Nintendo Switch. And with its use of voice commands and gestures, it's a very enjoyable experience. REVIEW Elden Ring Cracked 2022 Latest Version game: "Everfest: The Silver Guardians is an RPG that comes to the Nintendo Switch. I didn't personally find much to get excited about, but as an avid fan of the genre, I have to applaud what Intelligent Systems has attempted. The core game is solid and it has the ability to entertain. However, when there are so many flaws in the RPG mechanics, like an overly simplistic battle system, the lack of a helping hand to actually finish quests, and uneventful leveling, it's only a matter of time until the fun wears off. A demo is available now, which is definitely worth checking out if you're interested in the game and wish to get a feel for the gameplay. Now, if you'll excuse me, I think I'm going to go kick some monsters." Humble State: The Undiscover'd Arc 1.2 State: The Undiscover'd is a text-based adventure game set in the far future. You play as the interstellar traveler named State, who's been traveling through space for years, and landed on an unknown planet to try and find a home. But when you start exploring, you learn the planet is far more dangerous than you thought, and you have to find out how to get back to your ship without getting killed. What's new in Elden Ring:

So a few suggestions / things to think about when choosing your stat. WITHMP- Rule of thumb- Spell attack will always have more use unless you have a heavy weapon PAINT- well with the high defulity spell it is the easiest to get the better items HP- This is your attack power it is the damage you do rather than the strength stat. Your hit will go into the higest area (probably over 60 HP most likely) better items are higher ATK and a higher def aswell as lower HP is the baseline for all your allies *BOT* Death
