AutoCAD

History Autodesk has previously described AutoCAD as "the world's leading commercial CAD (computer-aided design) system." The first known public use of AutoCAD was in the early 1980s by Ed Kienow, an engineer at NASA, who developed his own "in-house" computer-aided drafting (CAD) system. Timothy Snider, an engineer at The Boeing Company, obtained a copy of AutoCAD in 1984, and used it to create a small CAD system for his development efforts, which he named X-Ware. The "paper sketch" was invented by Kienow, and is one of the first fully developed implementations of a "paper-based" CAD system, using a CAD standard called the Graphic Data System (GDS). Snider, like Kienow, was an employee of The Boeing Company. In 1984, Autodesk began selling copies of X-Ware, and later distributed a program called AutoCAD. From the beginning, Autodesk concentrated on selling its CAD program and did not sell X-Ware. The AutoCAD product was an extension of X-Ware and was a commercial product. In 1989, Autodesk released the first version of AutoCAD, which used the Microsoft Windows environment and ran on IBM-compatible microcomputers with graphics capabilities. In the mid-1990s, Autodesk began offering a smaller, and therefore cheaper, version of AutoCAD that could run on any IBM-compatible microcomputer. In 1995, Autodesk released AutoCAD R14, a version of AutoCAD for DOS and Windows, also called AutoCAD R14. This was the first version of AutoCAD that allowed installation and use from DOS-based workstations as well as DOS-based personal computers. In 1997, Autodesk introduced the first version of AutoCAD for Mac, which could also run on Macintosh and Windows computers, and had new file and installation formats. The first version of AutoCAD for mobile devices was released in 2001, and was renamed AutoCAD Mobile Drafting, with the ability to load and display AutoCAD drawings in a wide variety of mobile device environments, including the Palm OS, Windows Mobile, and Pocket PC environments. The mobile version of AutoCAD was released in tandem with AutoCAD LT (Linux

Autodesk Suite of Design Apps Autodesk has recently released a "Suite of Design Apps" consisting of three CAD programs and one Product Data Management (PDM) program. It is called Autodesk Design Suite and was unveiled on May 20, 2015. The suite was released to the public on September 7, 2015. Its major features include the following: Autodesk AutoCAD Architecture. This is the architectural and engineering (A&E) application of the suite. It includes design tools, construction tools and documentation. The user can work with a virtual site view and modify projects virtually using the design view. Autodesk AutoCAD Mechanical. This is the mechanical design tool of the suite. It includes design tools, construction tools and documentation. Autodesk AutoCAD Civil 3D. This is the civil 3D design tool of the suite. It includes design tools, construction tools and documentation. Autodesk Revit. This is the Product Data Management tool of the suite. New Features The AutoCAD Mechanical 2015 release is the first release of AutoCAD to include an improved interface for designing multi-story buildings. In September 2018 Autodesk released new features to Autodesk Architecture 2017, such as the ability to: Construct surfaces over assemblies and other objects to make them hollow or solid, including the ability to create a surface over other surfaces to make a hollow, solid, or composite af5dca3d97

Josh Sheehan scored 17 points and Gary Harris added 15 for the Hoosiers (27-7), who were led by Cody Zeller's 17 points and 10 rebounds. Victor Oladipo added 13 points and Christian Watford scored 12 for the second straight conference title. Indiana, which will earn the Big Ten's automatic berth into the NCAA Tournament, reached the title game after defeating Illinois in a one-point victory Sunday afternoon. Kentucky had two chances to win it with a game-winning basket from EJ Housten in the final seconds, but the Wildcats missed their second and third attempts. Housten finished with a team-high 20 points for Kentucky (26-8), who have lost two of their last three games. "Every time we put the ball in the basket we were able to get a stop anywhere on the court," said Kentucky coach John Calipari. "You're going to get tired of that. When you're winning you can put up with a lot of stuff, but when you're losing, you can't put up with it." The Wildcats played well in the first half, leading, 39-37, at the break. But the Hoosiers went on a 27-4 run to start the second half and went ahead 49-41 with less than five minutes left in regulation. Kentucky went ahead by four, but by the time they took the lead back the Hoosiers had made their nine-point lead a nine-point game. Indiana maintained its momentum and went ahead for good on a 3-pointer by Sheehan with less than a minute remaining in the game. It was the Hoosiers'
