

[Download](#)

the basic menu in access 2007 has many new features but if you have been sticking with access 2010 there are some new ribbons that you will like. it is all relatively easy to do and the tutorial follows each step. microsoft access has had several major versions since office 97 was released in 1997. it is still one of the most widely used software applications for development and data management, particularly within the scientific, education, business and finance sectors. it remains the best choice for the generalist because of its ease of use, many third-party developers and the wealth of features. recent versions have had a number of new features especially with the recent release of access 2010 as well as the ribbon interface. this tutorial is aimed at developers who are learning access development. the tutorial will cover development of a new form and a new form with a ribbon design. i have been working on my own access ribbon maker for quite a while, and i am now starting to share my results. in case you are not familiar with access 2007 ribbons, they are reusable individual graphic objects that you can drag and drop to form a ribbon for your user interface. the ribbon is very flexible and you can use any design you want. in addition, you can assign your own data to each button, and you can change the order and width of each button. log-in to access my site, and visit the create ribbon page. you can use the download ribbon template to start your own design. first, you will need to choose a template from the list. there are several hundred templates available. you can also create a new ribbon based on a ribbon you have created using the design ribbon template.

Idbe Ribbon Creator 2010 Serial Number
