What's New in the Steampunk CPU GPU Temperature Monitor?

Steampunk CPU & GPU Temperature Monitor is a program for monitoring the CPU and GPU temperature levels of your computer. As the name suggests, it's a widget that can be placed on your desktop. It can help you find out if your computer has overheated and protect you against a temperature increase. ... 7. Steampdump - Games/Arcade... Steampdump is a Python game which runs on DOS/Linux/Windows platform. The game features an open-source engine, and a simple, but challenging RPG game system. In Steampdump the player controls a young steampunker, named Charlie, and takes on the role of a treasure hunter searching for the long-lost treasures of his family. The game contains a lot of old-school features, like a top-down view, a full-screen battle system, a password-protected save file, a life meter, and a story-driven quest system. The battles are single-player and can be played offline, however, the game is highly replayable. Steampdump supports the use of a keyboard, a mouse, a joystick, and a gamepad. The game engine offers a lot of possibilities to alter settings, such as display resolution, music, sound, as well as the camera position, and field of view. Steampdump has been in development for about two and a half years now. It was inspired by a lot of old games, such as Ultima IV, Dungeon Master, Wizardry, NetHack, Phoenix Wright, Terraforming Mars, Xonotic, and many more. Steampdump uses a custom Python engine, which provides the standard functions of a DOS/Linux/Windows game. The Python code is saved and compiled, when running on Windows, to a.EXE file, which can be run on any platform. Steampump... 8. Sindy - Mobile/Games...
